

It is not a biocide for the purposes of article 3, paragraph 1, letter a), of EU regulation no. 528/2012. [IMPLEMENTING COMMISSION DECISION (EU) 2015/655 of 23 April /2015]

## READY-TO-USE PRODUCT IN CAPSULES FOR ECOLOGICAL CONTROL OF THE MOSQUITO'S LIFE CYCLE

**Aquatain Drops contains 0.25 ml of liquid product.**

### Composition of the liquid inside the capsules:

100 g liquid product contains:

Polydimethylsiloxane (PDMS silicone)	89.00 g
Inert ingredients and carriers	11.00 g

### Characteristics and field of application

Aquatain Drops is an eco-friendly, unique, next-generation product to control the lifecycle of mosquitos. The product is "eco-friendly" and respects the environment. Each capsule of Aquatain Drops is made using a cellulose derivatives and it is completely degradable in water. It contains 0.25 ml of a PDMS-based liquid that, by forming an ultra-fine film over the water's surface, prevents the development of mosquitos. It prevents the larvae and pupae from taking in the atmospheric oxygen they require to develop into adults and preventing the correct development of the mosquito in its immature stages (larvae and pupae). Its physical and mechanical action will remain efficient and in place for at least 4 weeks. Aquatain Drops respects the environment and is completely safe for use. Aquatain Drops can be used on small amounts of still or standing water within a domestic environment (plantpot saucers, wells, domestic drains, gutters, drainage canals, water tanks, water containers, tyres, etc.).

### Range and doses

- Small amounts of standing water (saucers under plant pots, pots, etc.): use 1 capsule.
- Medium amounts of standing water (domestic drains in courtyards, guttering, etc.): use 1-4 capsules according to the amount of organic matter present.
- In general, use 4 ml capsules per m<sup>2</sup> of standing water surface.
- Re-use the capsules at least every 4 weeks or after heavy rainfall.

The capsules dissolve in water within 1-4 hours, according to ambient temperature.

No specific personal protective equipment is required.

### Storage

Keep away from oxidizing agents. Keep away from children and pets. Close the package after use. Validity: use within 36 months from the manufacturing date. Recommended storage conditions: 15°C-25°C ambient temperature; relative humidity (R.H.): 35%-65%

Item	Code	Packaging
Aquatain Drops	1-274-2x15	Case of 30 drops (2 blister) in box of 100 cases
Aquatain Drops	1-274-1x15	Case of 15 drops (1 blister) in box of 100 cases
